

ApplicationModule

```
graph BT; LoggingModule --|> ApplicationModule
```

A UML class diagram showing an inheritance relationship. The 'ApplicationModule' class is represented by a white rectangle with a thin grey border at the top. The 'LoggingModule' class is represented by a grey rectangle with a thick black border at the bottom. A solid blue arrow points from the top of 'LoggingModule' to the bottom of 'ApplicationModule', indicating that 'LoggingModule' inherits from 'ApplicationModule'.

LoggingModule
